About the NL Centre for Health Information (NLCHI)

NLCHI provides quality information to health professionals, the public, researchers and health system decision-makers. Through collaboration with the health system, NLCHI supports the development of data and technical standards, maintains key health databases, prepares and distributes health reports, and supports and carries out applied health research, evaluations and analytics. NLCHI's mandate also includes the development and implementation of a confidential and secure provincial electronic health record, including the change management required to support adoption by end user clinicians. More information can be found at www.nlchi.nl.ca.
